

Murmure turns speech into momentum.

Hold a key. Speak naturally. Release. Clean text appears exactly where you were working.

Four green lights before you speak.

Apple Silicon

M1 or newer. The Intel edition is not available yet.

macOS 26+

Required for the modern speech and on-device model APIs.

Permissions

Grant Microphone and Accessibility when Murmure asks.

Local storage

Use the Mac or an external drive. Parakeet may download about 470 MB once.

Three moves. No new window.

01

Place the cursor

Click any editable field in Mail, Notes, Messages, a browser, or your writing app.

02

Hold

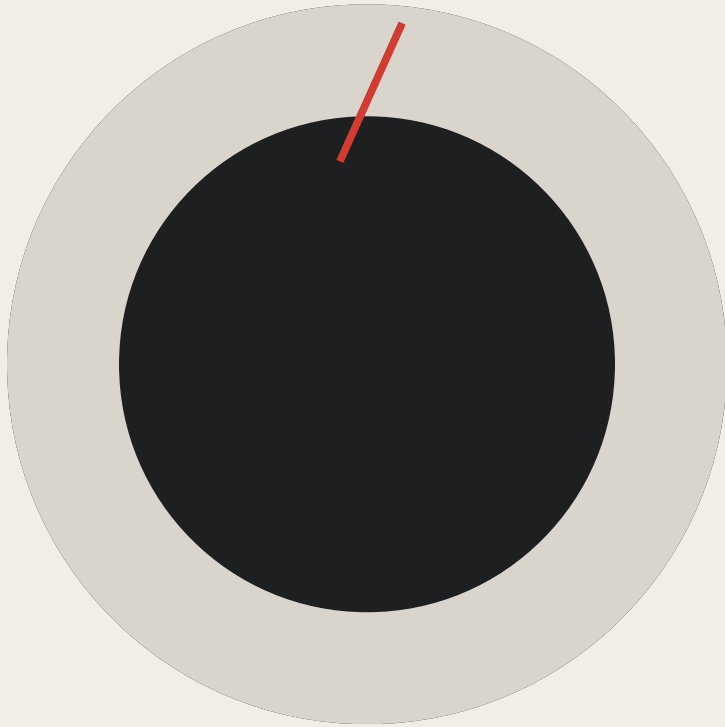

Speak naturally. The shortcut can be changed later in Settings.

03

Speak and finish

Enable While I'm speaking. Words appear at the cursor, then finish cleanly.

Speak the language. Murmure follows.

Language you speak: Automatic recognizes 25 supported European languages on-device. Display language changes Murmure's menus and supports English, Français, and Español without changing what you dictate.

Automatic

English

Español

Français

Edit selected text with your voice.

Select

We need to move the meeting because the current timing no longer works for everyone.

Select the exact text you want to change.

Review

"Make this shorter and friendlier."

Could we find a better time for everyone?

Replace

Copy

Cancel

Murmure refuses replacement if the original selection changed.

Four destinations. Six focused settings categories.

DESTINATION 01

Home

History, recoverable audio, replay, retry, correction, copy, and delete.

DESTINATION 02

Dictionary

Manage terms and hear-to-write corrections.

DESTINATION 03

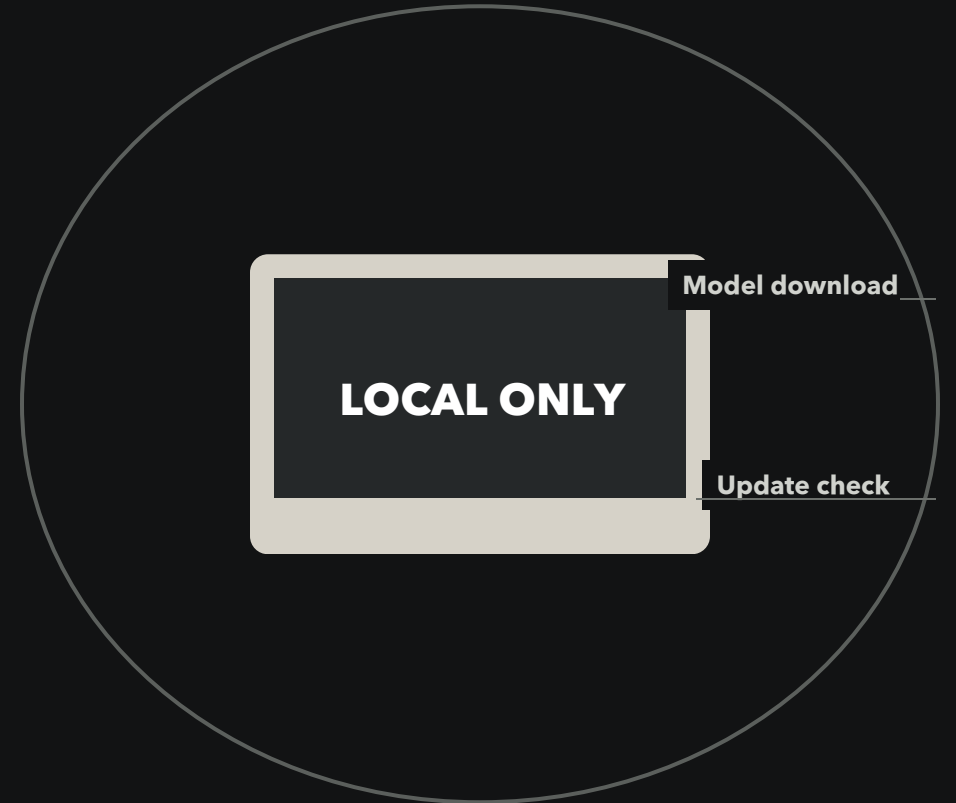

Snippets

Create reusable text, then say "Voice add" plus its trigger.

Your voice stays in your workspace.

Dictation remains local. In Settings > Privacy & storage, automatically delete completed history after 1 week, 30 days, 6 months, or 1 year, or delete everything now. Dictionary and Snippets stay untouched.

Delete one or all recoverable recordings from Home. Diagnostics never include dictated content.

Check the panel. Keep moving.

Microphone: Granted

Accessibility: Granted

Language you speak: Automatic

History retention: Never / 1 week / 30 days / 6 months / 1 year

Speak. Review. Keep moving.

Dictation

fn

Command Mode

^

⌘

⌘

D

For live typing, choose Dictation > While I’m speaking.
For cleanup, choose Privacy & storage. Say “Voice add” followed by a snippet trigger.
