

● LOCAL VOICE DESK

Murmure turns speech into momentum.

Hold a key. Speak naturally. Release. Clean text appears exactly where you were working.

Four green lights before you speak.

Apple Silicon

M1 or newer. The Intel edition is not available yet.

macOS 26+

Required for the modern speech and on-device model APIs.

Permissions

Grant Microphone and Accessibility when Murmure asks.

Local storage

Use the Mac or an external drive. Parakeet may download about 470 MB once.

Three moves. No new window.

01

Place the cursor

Click any editable field in Mail, Notes, Messages, a browser, or your writing app.

02

Hold 

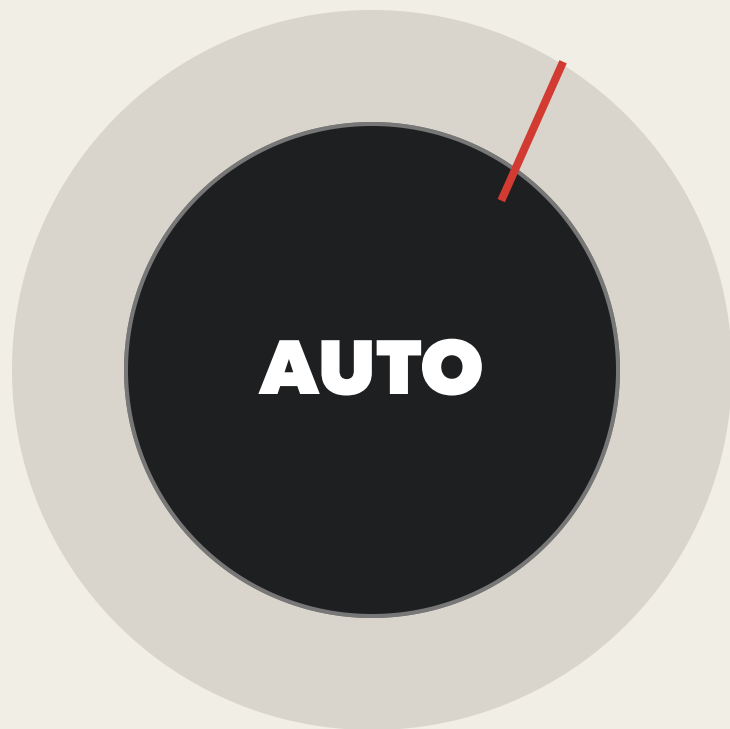

Speak naturally. The shortcut can be changed later in Settings.

03

Release to insert

Murmure cleans the transcript locally and returns it to the focused app.

Speak the language. Murmure follows.

Automatic recognition covers 25 European languages on-device. Cleanup removes fillers and improves punctuation without sending your speech to a server.

Automatic

English

Español

Français

Edit selected text with your voice.

Select

We need to move the meeting because the current timing no longer works for everyone.

Select the exact text you want to change.

Review

"Make this shorter and friendlier."

Could we find a better time for everyone?

Replace

Copy

Cancel

Murmure refuses replacement if the original selection changed.

It learns only what you choose to teach.

MODULE 01

Corrections

Turn a mistake into a safe contextual dictionary rule.

MODULE 02

Snippets

Say one exact phrase and insert reusable local text.

MODULE 03

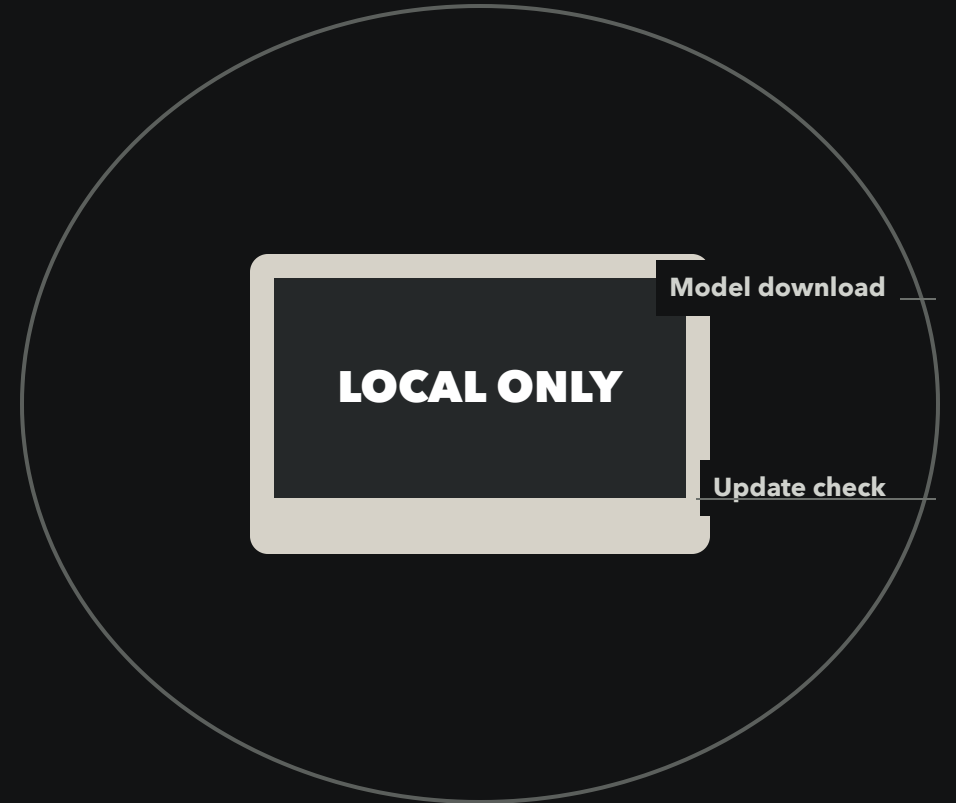

History

Replay, correct, or retranscribe saved recordings locally.

Your voice stays in your workspace.

Dictation, cleanup, Command Mode, audio, history, snippets, and dictionary data remain on your Mac or selected external drive.

Diagnostics exclude dictated text, audio, history, snippets, dictionary entries, and local file paths.

Check the panel. Keep moving.

● Microphone: Granted

● Accessibility: Granted

● Language: Automatic

● Storage: Ready

● **Speak. Review. Keep moving.**

Dictation

Command Mode

If permissions just changed, quit and reopen Murmure.
Updates live in Settings.
